## DETAILED ACTION

Applicant's election without traverse of Group I, claims 1-16 and 24-31 in the reply filed on 14 November 2005 is acknowledged.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-16 and 24-31 are rejected under 35 U.S.C. 102(e) as being anticipated by Thamby et al. US 6,841,859.

Thamby et al. discloses forming an electronic device in a chamber including forming a core material (42) in a depression in a substrate (36) and preparing the outer surface, and establishing a layer (44) on the outer surface, the layer and the substrate defining a chamber, also the layer is optically transmissive and the core material is a resin which can exist in two states depending on conditions (see figs. 1A-E and related text).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
